How to use the iOrienteering App

1) Download the App from the **Google Play** or **Apple.**

   Use the links on our site or search under **iOrienteering**

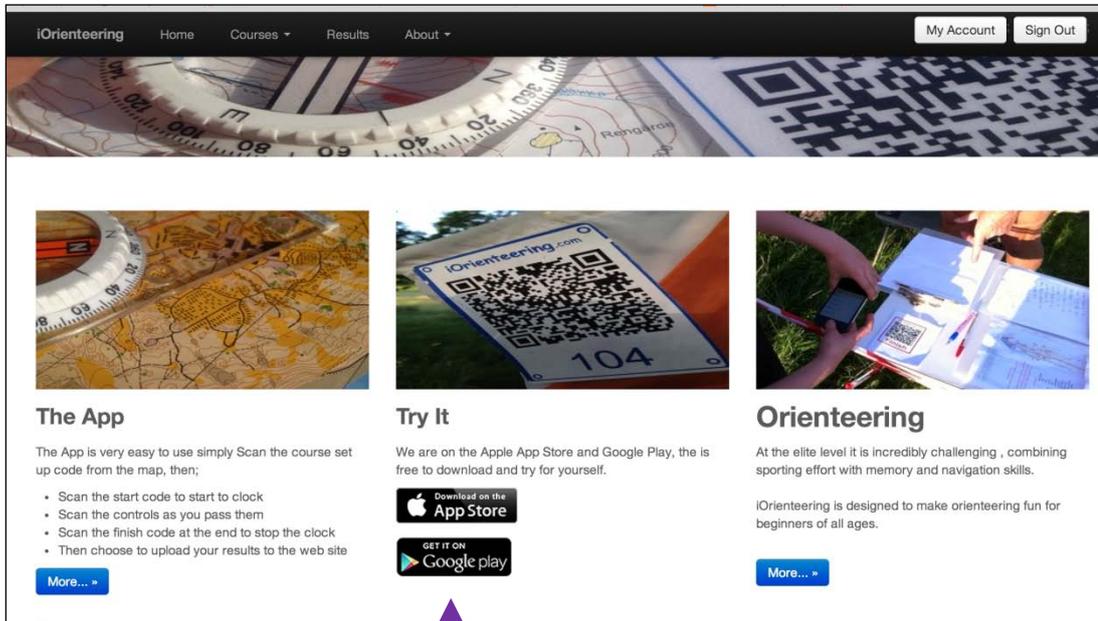

Figure 1- Downloading the app to your phone- follow the link from our site
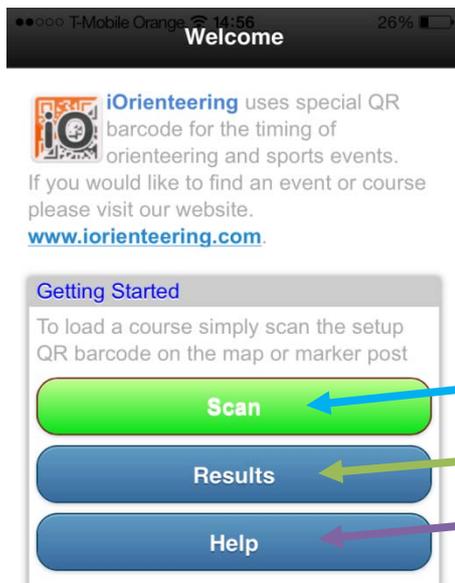

2) Open the App on your phone

Figure 3- The welcome page on the app

Press the scan button to load the setup barcode

Results takes you to your old results stored on the phone

Help takes you to the descriptions of each page or action

3) **Press scan** and hover the camera over the set up code. The course data is loaded so please allow a few seconds up. The screen should show you the **course name** plus you can see a **list of the controls (numbers, codes and values)**

**Figure 4- The course page with
title and check point details**

Course name

List of the controls (numbers, codes and values)

4) **Once you are ready to start press Scan** and then picture the start barcode in the camera image. The timer should start. Run around the course visiting the controls.

NB: For linear course it should report if you visit a control out of order and ask if you want to abandon the course or ignore the wrong control.

If on a score event it should report if a control not on the course is visited and ask the same question.

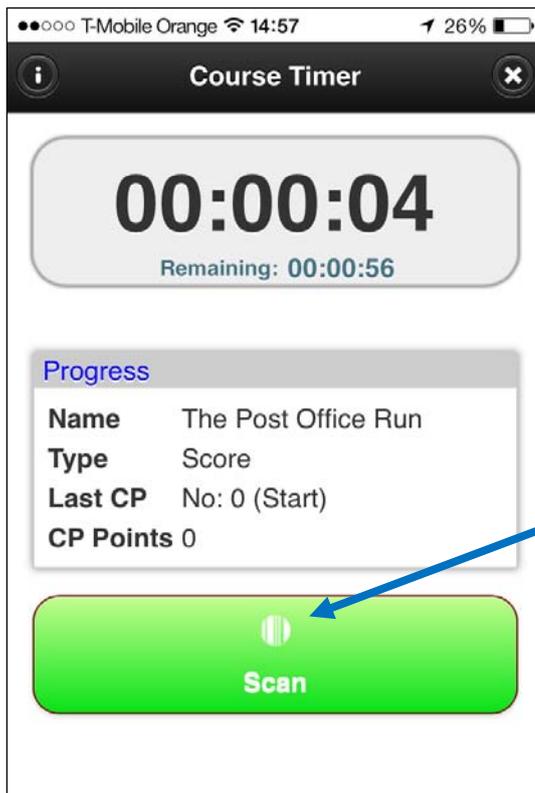

Figure 5- Once the event starts the phone displays the course timer

Press scan at each check point you come to.

Note: You can press the button early to make sure the viewer is open when you get to the check point

5) Once completed, scan the finish control to stop the timer.

6) You can **delete** or **upload your results** using the buttons at the bottom.

Figure 6- *Delete* or *Upload your results*

Delete

Upload

Look at previous results

7) **You'll need to log in with your previous details** or **register first if you are new**. **Once uploaded** they can't be uploaded again.

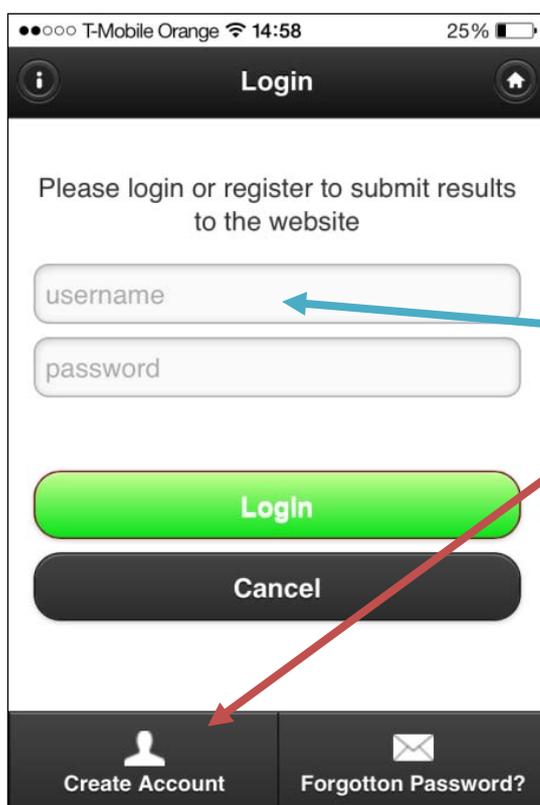

Figure 6- Login page

Log in with your previous details

Register first if you are new

NB: There is a small error with login currently. To work around it press the green Login button before you enter your user name and password (else it tries to create a new user)
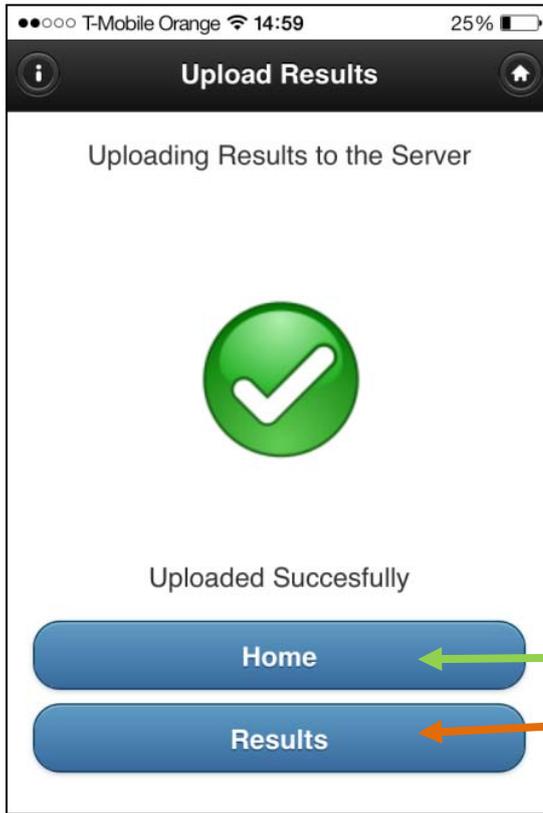

Figure 7- Results uploaded fine

Once uploaded you can go to the home page to start again or review your previous results stored on your phone

Back to the home page

Previous results

8) You can look back at **previous results** or use the home or house button in the top right hand corner to go back to the home page to start the course again

NB: <u>Shortcut</u>: if you want to run a course again and it was the last course loaded or used on the phone then you don't need to scan the set up code again. Simply scan start and the timer should activate
